March 2010

LOADING COMPLETED!

On Tuesday the 2nd of March, the last MG truck left MG with the last piece of the MG 36220V.

Destination: CIB S.r.l., Brescia!

It will take almost a week to assemble the entire machine, after that MG Technicians will test it.

Don't miss the next MG News (April 2010), to see how the monster works!

MG is ready AGAIN!

A great beginning of the year for MG, that after delivering the MG 36220V, is ready for other two huge machines. Another one like this just finished and a bigger one!

Some of the material for them is already at the Company and MG Team is working to get the best result possible!

MG CNC TOUCH COMMAND always in PROGRESS!

Two new languages came up for the MG CNC, Suomi and Portuguese.

The system is always in progress, as MG wants for every single Customer, the best solution!

This philosophy makes of MG the best Plate and Section Bending Machines constructor in the World.

Inquiry for huge SECTION BENDING MACHINE!

MG has got an inquiry for a Section Bending Machine with 530 mm shafts diameter.

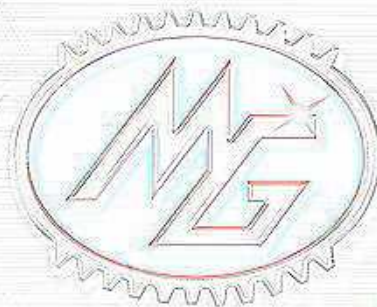

It will be possible to bend HE profiles, easy and hard way, up to 650mm!

MG is developing the project together with all the Technical Dept. and MG Sales Dept. to obtain the best of the quality. Like usually happens in the Italian Company, everyone is working for a common objective, and everyone is doing his best to reach it.

MG 36220V
Calandra a tre rulli per
spessori fino a 220 mm.

“Alcuni dicono che la vita creativa sta nelle idee. Altri dicono che sta nei fatti. È comunque sempre l'amore per qualcosa.”

Giuseppe Pirella Göttsche

N.1 in Italy, in the World.
