Made in Italy.
October 2010.

EmoBLECH 2010

Hannover - Germany
From the 26th to the 30th of October
Hall 12 Stand B57

Its name is MG 32520Z and it is the new made in Italy monster! Almost 400 Tons of technology and passion composes the last big sale of the Italian Company. The destination is Spain, Bilbao, to Lointek specialized in Solar Panels, Petrochemical, Engineering Services and Singular Constructions based on Customers needs. A market that now more than ever, is growing very fast and MG with its mentality projected onto a green energy future, wants to be part of it.

The machinery has a capacity of 250 mm, it is able to bend a plate 250 mm thick on a total length of 3.200 mm. The top roll diameter is 1.400 mm and the side rolls diameter are 1.200 mm, the total length of the machine is 13.700 mm, the height 7.700 mm and the width 7.100 mm.

The top roll alone has a weight of 53 Tons and the two side rolls of 47 Tons each. Now, how to transport it? MG has several dedicated Transportation Companies, always ready to deliver materials! This loading will take 17 trucks, 12 of them will be exceptional transports. In this cases only a Company with well based confidence relationships with all its sub contractors can handle this kind of operations. The delivery of the whole machine will take four weeks.
