SAIPEM do BRASIL chooses MG for offshore platforms in the Atlantic ocean

March 2013

Made in Italy.

The multinational colossus SAIPEM, the biggest Italian company that deals in the Oil & Gas Industry, has chosen MG's MH460Y with full accessories. The plate roll that is a 4 roll, 4mt machine, capable of rolling up to 60 mm, will be installed at Guaruja near Santos in the Sao Paulo region of Brazil. It will be used to build offshore platforms for PETROBRAS in the Atlantic Ocean off the Brazilian coast.

Mr. Barthelemy, who is in charge of the South American sales, and Eng. Barca, were able to beat the competition and convince SAIPEM that MG was the best solution for them. Other key factors for SAIPEM's choice were that they had worked in different projects with MG in the past, the quality of the MG machines as well as the excellent aftersales support MG always provides to their customers.

18 – 20 April 2013
We will be present at the :

'Beijing International
Special Exhibition'.
