MG delivers a 4 Mt. x 1500Tons Variable Geometry to South Korea!

May 2013

MG sold and delivered a variable axes in Ulsan, South Korea. The machine, a 4-meter rolls width and 1500 Tons pressing capacity, was sold after strong competition, but MG managed through its professionalism and technology to secure the order for our model PH4.1500. With a 110mm bending capacity. The customer DKT Co. Ltd. Was founded in 1988 and it is now one of the biggest plants in the chemical and energy field. With its 250.000 m2 ground, over 1200 workers, its range goes from pressure tanks to stocking silos and blowtorches.
